

src/scripts/scripts.h

```
graph TD; A[src/scripts/scripts.h] --> B[../io/input.h]; A --> C[signals.h];
```

The diagram illustrates a header file dependency. At the top, a gray box contains the text 'src/scripts/scripts.h'. Two blue arrows originate from the bottom of this box and point downwards to two separate white boxes. The left box contains the text '../io/input.h' and the right box contains the text 'signals.h'. This visualizes that 'src/scripts/scripts.h' includes both of these files.

../io/input.h

signals.h
